## PATIENT INFORMATION BOOKLET

Dr Campbell-Lloyd not only has advanced post-fellowship training in breast reconstruction, but also additional subspecialty training in Aesthetic breast surgery.

**We see patients for a range of conditions, including:**

- Breast augmentation
- Breast lift/ mastopexy
- Revisionary surgery after previous breast implants (including breast implant removal, capsulectomy and implant replacement)
- Breast reduction
- "Tuberous" breast and other congenital asymmetries
- Fat grafting of the breast

Some of these procedures are covered by health insurance, but recent changes in the Medicare rules have come into effect from November 1 2018. This can be a complex area to navigate, and most patients will require a minimum of 2 consultations prior to any procedures being performed.

**Dr Campbell-Lloyd also performs facial aesthetic surgery including:**

- Face and neck lift
- Blepharoplasty (eyelid surgery)
- Brow lift
- Facial enhancement with fat grafting
- Otoplasty (pinning back ears)

## PRE- OP

---

**You will have an initial 1 hour consultation with Dr Campbell-Lloyd during which you will:**

- Discuss the procedure you are interested in having done
- Be assessed to determine whether you are a candidate for your chosen procedure
- Be examined, at which time specific measurements will be taken (with the assistance of our female practice nurse)
- Have pre-operative photographs taken by the practice nurse
- Have 3D imaging conducted (depending on the procedure)

You will not be able to book an operation after this first consultation. You will be required to take the information provided away with you to consider your options. In most cases we require that you see Dr Campbell-Lloyd for a second consultation (which is included in your initial consultation fee) prior to booking your surgery.

A quote for surgery will be prepared and sent to you after your consultation. We will obtain fee estimates from the anaesthetist and the hospital to be able to provide a comprehensive and accurate quote for your surgery.

## PATIENT INFORMATION BOOKLET

### POST- OP

- You will be swollen and bruised regardless of the type of surgery.
  - Your appearance immediately post-op is not an indication of how you will look once you have recovered
- You may be required to wear a garment
  - This will be discussed in your pre-op consultation
- You will have a post-operative appointment within 1 week of your surgery
  - This is a good time to ask all those questions that have arisen since your surgery. Your next appointment can be anywhere between 1-4 weeks, depending on your procedure, how well you are recovering, and your individual circumstances.

For breast and abdominal surgery:

- Sorry, no swimming at the beach or river for a while. You cannot immerse yourself in water for a few weeks, this includes baths and spas.
- If you have children it's best to prepare them that mum won't be able to play or lift them for the first 6 weeks
- Put your gym membership on hold! You won't be needing this for a little while. We recommend 6 weeks before easing back into the exercise

### COSTS

Below are some common aesthetic procedures and an estimation of surgeon's fees\* associated with them.

**Abdominoplasty:** \$4,990\*\*

**Breast Augmentation:** \$3,690 \*\*
